

**Intent:**  
 At Eggbuckland Community College, the Art department believe that art, craft and design education provides and inspires personal expression, cultural understanding, creative and practical responses, promoting imaginative risk taking to provide solutions to our material, emotional, social and digital worlds. An art and design education will engage, inspire and challenge pupils, equipping them with the knowledge and skills to participate in, experiment with, invent and create their own works of art and design. Pupils should be able to think creatively and critically. They should investigate and evaluate a wide range of creative outcomes from the past and present to develop understanding of the many disciplines within art and design and how they shape our history and future. This will enable pupils to contribute as confident citizens and future professionals to the culture, creativity, economic success, leisure, material and emotional wellbeing of our society within both local and national contexts.
